## From the Executive Director's Desk

Don't you love the Spring season? All around us we see renewal and new life, bringing a smile to everyone. We hope you're able to enjoy this special time of year with loved ones.

We're experiencing newness at CSM, too this season, with the welcoming of Maternal and Family Health Services in Pennsylvania to the clinicians we serve. Welcome to the CSM family of care providers!

We're also excited to announce a new CT/GC testing platform at CSM: the Gen-Probe APTIMA Combo 2<sup>®</sup> Assay. Offering the highest sensitivity

available, high specificity for swab specimens, and availability from ThinPrep specimens, we believe we have a winner for you and your patients. It's available soon, so make sure you have all the collection kits you'll need to take advantage of this new test.

As always, thank you for choosing CSM to partner with you to serve your patients. If there's a way we can better help you, we'd love to hear from you.

  
Michael LaFriniere  
Executive Director, CSM

## Client Service Connection — Filler-In!

**Reflex, Non-Reflex or HPV only:** The box you check  **WITH HIGH-RISK HPV-DNA REFLEX** (Pap result determines if HPV test is performed) determines when and if we'll perform an HPV test: Choose **REFLEX** if we should only perform the HPV test if the Pap result qualifies (e.g., ASCUS); choose  **WITH HIGH-RISK HPV-DNA NON-REFLEX** (HPV test is performed regardless of Pap result) **NON-REFLEX** if you want us to perform an HPV test regardless of the Pap result (i.e., always).

**IMMUNOLOGY/OTHER** If you wish us to only perform an HPV test (without a Pap test), mark the **HIGH-RISK HPV-DNA** box in the IMMUNOLOGY/OTHER section of our requisition instead.

**Breast Specimen Collection Time:** It is very important for our pathologists to know the time a breast specimen is collected and the time the specimen is placed in formalin. Please record the collection time, and, if there is a delay of more than a few minutes, the time the specimen is placed in formalin on the requisition for all breast specimens. Thank you!

**No More Waiting — Get Results 24 Hours a Day... With e-reporting**  
Application forms are available at [www.csmlab.com](http://www.csmlab.com) or give us a call!
